Career Objective

Motivated Computer Science student with knowledge of Java, Python, C, SQL, HTML, and CSS. Familiar with Core Java, OOP concepts, Collections Framework, JDBC, and Servlets, with a growing understanding of Advanced Java and Spring Boot. Eager to apply programming and problem-solving skills to develop efficient software solutions and grow as a Java Developer.

Technical Skills

Programming Languages: Java, Python, C
Database Technologies: SQL
Web Technologies: HTML, CSS
Core Java Concepts: OOP, Collections Framework, JDBC
Java/Backend Technologies: Servlets, Spring Boot
AI Technologies: Generative AI

Internship

Java Technology Intern – Infosys Springboard

- Developed FarmChainX, a farm-to-consumer crop traceability system to improve transparency across the agricultural supply chain.
- Built REST APIs using Java and Spring Boot to manage crop inventory and supply chain data.
- Integrated a React.js frontend with a MySQL database to support crop information management.
- Implemented role-based access for farmers, distributors, retailers, and consumers.
- Developed QR code-based crop tracking to help users access crop details, origin, quality information, and supply chain status.

Projects

FarmChainX – Farm-to-Consumer Crop Traceability System

Technologies: Java, Spring Boot, React.js, MySQL, Python

- Developed a full-stack application to improve agricultural supply-chain transparency by tracking crop inventory and product details.
- Implemented REST APIs using Spring Boot and integrated a React.js frontend with MySQL for inventory management.
- Built QR code generation and scanning functionality to retrieve crop details and supply-chain status.
- Designed dashboards for different supply-chain users to support crop tracking and inventory visibility.

Customer Churn Prediction using ANN

Technologies: Python, TensorFlow/Keras, Scikit-learn, Streamlit
Live Demo | GitHub

- Built and deployed an ANN-based customer churn predictor (TensorFlow/Keras, Scikit-learn) achieving ∼85% validation accuracy, with an interactive Streamlit app for real-time churn probability.
- Handled data cleaning (duplicates, missing values), categorical encoding and feature scaling; used EarlyStopping and TensorBoard for training monitoring.

Personal Developer Portfolio Website

Technologies: Java, Spring Boot, Thymeleaf, Tailwind CSS, MySQL
Live Demo | GitHub

- Designed and built a responsive portfolio website using Java, Spring Boot, Thymeleaf, and Tailwind CSS.
- Stored project data in MySQL using Spring Data JPA and displayed it dynamically on the website.
- Developed a contact form with email delivery, downloadable resume, and GitHub links.

Certificates

- NPTEL – The Joy of Computing Python (Elite)
- NPTEL – Introduction to Programming in C (Elite)
- NPTEL – Introduction to Java Programming (Elite)
- NPTEL – Human Computer Interaction (Elite + Gold)

Education

Vignan's Nirula Institute of Technology and Science for Women
